Election/Restrictions

Applicant's election with traverse of Group III, claims 29-74 in Paper No. 8 is acknowledged. The traversal is on the ground(s) that all the claims are sufficiently related so as to not impose an undue burden on the Examiner to search the related groups. This is not found persuasive because the inventions are distinct and would require different areas of search. For example, a phase separated mixture of a hydrophilic lubricating material and an oleophilic material is completely different than a liquid hydrocarbon oil.

The requirement is still deemed proper and is therefore made FINAL.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 29-74 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-68 of U.S. Patent No. 6,576,298 B2 ["Bennett et al"]. Although the conflicting claims are not identical, they are not patentably distinct from each other because the method comprising (open-ended) lubricating the interface

between a conveyor and a shaped article with a liquid hydrocarbon oil or emulsion stable to phase separation which may comprise an additive may be the same.

Claims 29-61 are also rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-38 of U.S. Patent No. 6,427,826 B1 ["Li et al"]. Although the conflicting claims are not identical, they are not patentably distinct from each other because the methods of lubricating the interface between a container and a moving conveyor surface may be the same.

Claims 62-74 are rejected under 35 U.S.C. 101 as claiming the same invention as that of claims 39, 45-47, 51, 56-58, 60-61, 68-70 of prior U.S. Patent No. 6,427,826 B1 (Li et al). This is a double patenting rejection. These claims are identical.
